Welcome to the Utilization Report

This report consists of four pages. All of the pages have the same basic layout as seen here with a CONTROLS area that allows for filtering and slicing the information for all visuals on the page. These controls stay in sync with one another across pages of the report. Use the RESET button to reset the controls to their original state.

All pages except this Introduction page and Executive Summary page have Drillthrough enabled. To use the Drillthrough feature, right click on any element within a visual containing information about a Division, Branch, Employee Type or an Employee. Choose Drillthrough and then select the drillthrough page. You will be switched to that page of the report and the page will automatically be filtered by the original visual element. **Green text** are dynamic titles on these drillthrough pages that assist in reminding you what you have drilled down upon. Use the BACK button to move back to the original page.
